ENERGY PRODUCTION  
(PLANNED PROJECT)

- The company was founded in 1985., like a result of a long private activity.

Headquarters is located in its own premises, located along the regional road Visokio-Kakanj, in place called Donje Moštre.

- Main activity is sales of motor fuel; we offer costumers a wide range of lubricants known manufacturers in the world.

❖ A significant role in the performance of activities of the company makes the provision of the transport services with a well-equipped trucks – volvo, mercedes, scania.

SINCE 2010.WE DECIDED TO EXPAND THE BUSSINES, SO WE HAVE BUILD THREE FARMS FOR BREEDING CHICKENS (BROILERS); WE ALSO HAVE LAND ON WHICH WE COULD BUILD A POWER PLANT, USING THE EXISTING MATERIAL.

## HOW WE PLAN TO PRODUCE ENERGY ?

- Using manure from chickens and vegetable waste.

Annually we produce 1,500 tons of chicken manure, and with additional material, we can use it for energy production the construction of power plant strength of 150 kw per hour. In this way we will solve the problem of large amounts of fertilizers and plant waste which can not be deposited or otherwise exploited.

## THE BENEFITS OF THE PROJECT

- while production of electricity,
- heat production,
- production of heat treated manure.

## BUDGET EXPECTED INVESTMENT

- total investment costs amount to about 700 000 euros.
- return on investment is expected in the period of five years maximum.

The expected form of cooperation with the investor ?

- 50% of the total cost of the investment would pay with our own funds or through loans, 50 % would be paid by a foreign investor, which can be adjusted by agreement.
- We are open to any kind of negotiation and cooperation.
