

Construction of bio waste boiler room in Zepce

Sarajevo, May 2016.

ŽEPČE

Location:

Bosnia and Herzegovina
Žepče municipality
Zenica-doboy county

BASIC INFORMATION ON ŽEPČE

- ▶ Total surface 282 km²; 15,8% arable land, 63% forests, 21,2 % roads and other
- ▶ Direct access to E73 (Corridor Vc), Primary road M-17 Bosanski Šamac - Žepče - Sarajevo, Regional road R-465 (Žepče - Zavidovići - Tuzla), Regional road R-474 (Žepče- Novi Šeher - Tešanj), railroad Budapest-Bosanski Šamac-Sarajevo-Ploče (port)
- ▶ Coordinates (18°2'N, 44°25'E), position (South East Europe - Central Bosnia)

Primary goal of the project:

The goal of the project is the construction of biomass boilers, 4 MW of strength, which will be owned by the city (public utility company), which will be modular so it is used with optimum effectiveness and that will in the environment emit a minimum of harmful products.

Key characteristics and advantages:

Construction of a new biomass boilers, strength of 4MW will create conditions for system expansion to new users. Currently, on the central heating system there are connected 13 public institutions, 94 enterprises and 356 households. Due to the absence own boiler room, expansion of the network is not possible even though there is a need for ti. With the construction a new boiler number of users would increase by 30%

Costs

- Total value of the project - 1,000,000.00 EUR
- Funds from the budget of the municipality of Zepce 10% Funds from higher levels of government, funds, donors 90%

Expected mode of cooperation

- Explain the expected form of cooperation with the new investor: joint venture, grants, credit - Municipality would co-finance 10%

Other information

- In the town of Zepce there is the district heating system that currently use 13 public institutions, 94 enterprises and 356 households. Currently, as a source of thermal energy used is the coal boiler strength of of 6.3 MW, which is owned by "Krivaja" doo. Zepce and for which we pay annual rent. The above boiler is too big for current needs of Zepce (6.3 MW of which is used about 2.2 MW) which is why operating costs are extremely high.
