

OPĆINA ŽEPČE

Construction of sewerage in settlements Opsenik, Zenički put, Berek and Luke

Sarajevo, May 2016.

ŽEPČE

Location:

Bosnia and Herzegovina
Žepče municipality
Zenica-doboy county

BASIC INFORMATION ON ŽEPČE

- ▶ Total surface 282 km²; 15,8% arable land, 63% forests, 21,2 % roads and other
- ▶ Direct access to E73 (Corridor Vc), Primary road M-17 Bosanski Šamac - Žepče - Sarajevo, Regional road R-465 (Žepče - Zavidovići - Tuzla), Regional road R-474 (Žepče- Novi Šeher - Tešanj), railroad Budapest-Bosanski Šamac-Sarajevo-Ploče (port)
- ▶ Coordinates (18°2'N, 44°25'E), position (South East Europe - Central Bosnia)

Primary goal of the project:

Connect the waste water of those settlements to the existing city sewer network and purifier in order to reduce pollution that is discharged into the channel and protect public health and ensure better living conditions.

Key characteristics and advantages:

The project will include the returnee local communities numbering up to 2,000 people and aims to ensure the sustainability of return. According to the the calculations water consumption for these settlements is 16.25 l / sec, and taken planning period is 30 years with the rate of population growth 1, 25%, and according to these data, the new network is essential. Implementation of the project will create infrastructural preconditions for further development of these local communities.)

Costs

- Total value of the project - 405.000,00 EUR
- It is planned to apply for tenders coming from higher levels of government with co-financing by the Municipality of Zepce of 10%.

Expected mode of cooperation

- Explain the expected form of cooperation with the new investor: joint venture, grants, credit - Municipality would co-finance 10%

Other information

- The project envisages the formation of primary sewage network in suburban areas Opsenik, Zenički put, Berek and Luke, taking into account the already existing built network. Newly formed network will have to collect all the waste water from the area of those villages. Disposition of wastewater per project is planned by connection to the existing drainage system, which is connected to the existing system for waste water treatment of the city Zepce.
