Primary goal of the project:

To ensure ecological and hygienic acceptable collection and treatment of waste water in local communities Orahovica and Preko in order to increase economic activities and environmental protection.

Key characteristics and advantages:

Construction of the sewage collection system will almost completely eliminate the pollution caused by faeces and wastewater, and facilitate the development of environmentally friendly agricultural activities and the development of new and expansion of existing manufacturing enterprises at the location.

Costs

- Total value of the project - 620.000,00 EUR
- It is planned to apply for tenders coming from higher levels of government with co-financing by the Municipality of Zepce of 10%.

Expected mode of cooperation

- Explain the expected form of cooperation with the new investor: joint venture, grants, credit - Municipality would co-finance 10%

Other information

- The municipality currently has prepared technical project "Right coastal sewerage collector with a connection to the existing fecal left coastal main sewer along the river Bosna MAIN PROJECT" for which is seeking funding. Due to the unresolved issue of wastewater disposal, opening new trades regardless of the activity is disabled in the area of this two local communities. Doing business for existing business entities is harder because of the problem of untreated waste water, cantonal and state inspection are increasingly imposing high fines.
