## Primary goal of the project:

The project aims to improve transport links in the area above the city football stadium in Zepce, enable seamless and secure traffic communication in this part of the town, and unload the main road in Zepce, ease traffic on this route and shorten travel times of the local population in kindergarten, school, work etc.

## Key characteristics and advantages:

With the construction this roads peripheral undeveloped parts of the city / plots would get on value, this part of the city would be revived and construction would be increased in this part of town.

## Costs

- Total value of the project - 250.000,00 EUR
- It is planned to apply for tenders coming from higher levels of government with co-financing by the Municipality of Zepce of 10%.

## Expected mode of cooperation

- Explain the expected form of cooperation with the new investor: joint venture, grants, credit - Municipality would co-finance 10%

## Other information

- The project envisages construction of city roads beyond city's football stadium. Roads are partially located in the railway zone in one place and touches into one part of rail zone. In this part it is planned to abolish the upper footpath due to the increased width. The project will build a parallel road that would connect peripheral entities in the city and thus relieve the main road which is currently overloaded.
