

Tyre recycling producing line

Recycling project under brand “EcoFAN”

FAN-commerce d.o.o. Visoko, Bosnia and Herzegovina

Waste tyres problem

- BiH does not solve the problem of waste tyres that are available in large quantities at known and illegal dumps
- In addition to the existing waste, annually generates about 18,000 tons of used tires in Bosnia and Herzegovina with steady growth
- It is known that tires illegally burning to destroy, getting energy and recover metals

Mechanical recycling method

- Complex process
- Environmentally friendly
- Safe for humans and the environment
- Utilization of the total rubber material 100%
- The creation of new raw materials for new products

The products obtained by recycling

- 75% rubber granules or powder rubber

- 20% steel wire

- 5% of textile fibers

The use of the obtained products

Recycling is our future!

Thank you for attention
