2016
Reconstruction
of the hospital

2016-2017.
Emergency care
introduction

2017-2019.

Hospital to Home
Care (service-
rehabilitation/recov
er/health ageing)

2. Emergency Care available for for all

• Benefits for the community

For the patient

- Faster, more confident diagnosis and intervention
- Increases patient satisfaction and value- **saving lives**
- Improves comfort for patient and family

For the clinician

- Improved patient care
- More focused time with patients to focus on disease management
- Increased job satisfaction for doctors to stay in hospital

For the USK

- Improved quality of care
- Increased equipment utilization
- Improved revenue cycle
- Reduced costs

Solutions for image-guided therapies and minimally-invasive procedures

The combination of imaging solutions helps you to decide, guide and confirm the right therapy for each patient in real time during the procedure.

3. Project implementation phases
